PRIMARY EXAMINER

Continuation of 3. NOTE: claim 5 has been amended to recite constructing a humanized mouse library instead of a human library and this would alter the scope of the claim and result in a 112 first and second rejection. A 112 second because it is unclear if the other framework regions are from human as implied before in a human library. In addition, the claim would result in an enablement rejection because it is unclear if the library only has one CDR.
